Troels Henriksen

# This was my last lecture this year

## Final advice

- Check your return codes.
- Use `assert()` liberally.
- Use a better language than C if at all possible.
  - ▶ If you can't find one, make it yourself.
  - ▶ C++ is not that language.
- *Every* piece of technology we use was built by humans.
  - ▶ You can learn what they did, and do an even better job.

# If you like this kind of stuff, take these courses

- **Programming Massively Parallel Hardware**

- ▶ Block 1.

- ▶ <https://github.com/diku-dk/pmph-e2022-pub>

- **Data Parallel Programming**

- ▶ Block 2.

- ▶ <https://github.com/diku-dk/dpp-e2021-pub>
